AGREEMENT REACHED.

Commission to Be Appointed to Adjust Miners' Strike.

All Questions at Issue Between Companies and Their Own Employees, Union or Non-Union, Shall Be Referred To It.

Washington, Oct. 14.—J. Pierpont Morgan and Robert S. Bacon, representing the mine owners, arrived here at 10 o'clock and shortly afterwards went to the temporary white house, where a conference with President Roosevelt in regard to the miners' strike was held. An agreement was reached and at 11:50 the conference broke up.

Secretary Cortelyou, by authority of those present at the white house, made public the following authorized statement concerning the conference: "Mr. J. P. Morgan came to Washington with his partner, Mr. Bacon, at the request of the coal companies, who desired that as a matter of courtesy their statement should be shown to the president before it was made public. Having been told before the president by Mr. Morgan, it is now given to the press.

"It will be remembered that at the conference in Washington October 3 we made the following offer: That we would take up at each colliery any alleged grievance, and in the event of a failure to make satisfactory adjustment the questions at issue to be submitted to the final decision of the judges of the court of common pleas of the district in which the colliery is located. This offer was made by us in good faith and we desire here to reaffirm it.

"The coal companies realize that the present public need of coal and the apprehension of an inadequate supply for the approaching winter calls for an earnest effort to reach a practical conclusion which will result in an increased supply and the presidents of the companies desire to make every effort to that end which does not involve the abandonment of the interests committed to their care and of the men who are working and seeking to work in their mines. This responsibility they must bear and meet as best they can.

"They therefore restate their position. That they are not discriminating against the United Mine Workers but they insist that the miners shall not insist that the companies shall work with non-union men; that there shall be no restriction or quality of work, and that owing to the varying physical conditions of the anthracite mines such colliery is a problem by itself.

"We suggest a commission to be appointed by the president of the United States (if he is willing to perform that public service), to whom shall be referred all questions at issue between the respective companies and their own employees, whether they belong to a union or not, but decision of that commission shall be accepted by us.

"The commission to be constituted as follows: 1. An officer in the engineer corps of either the military or naval service of the United States. 2. An expert mining engineer, experienced in the mining of coal and other minerals, and not in any way connected with coal mining properties, either anthracite or bituminous. 3. One of the judges of the United States courts of the Eastern district of Pennsylvania.

"A man of prominence, eminent as a jurist. 4. A man, who by active participation in mining and selling coal is familiar with the physical and commercial features of the business. It being the understanding that immediately upon the constitution of such committee, in order that labor and non-production may cease instantly, the miners will return to work and cease all interference with the production of any non-union men who are working or shall hereafter work.

"The findings of this commission shall be effective and shall govern the conditions of employment between the respective companies and their employees for a term of at least three years.

"The note appended to the statement reads: "The schedule referred to in this statement was not brought from New York, as it had not been completed."

"The next move will be the presentation of the matter to the miners, and it is probable that President Roosevelt will be invited to Washington to consult the president. It is believed here that he will at once accept the proposition.

According to the confession the Negro subjected Miss Hicks to indignities and killed her with a target rifle barrel, after beating her into insensibility. He drove the end of the barrel into her head through one of her eyes.

There is an expressed determination to burn the prisoner if he can be secured. Sheriff Spragley tried to get a messenger through to the governor telling him of the situation and asking for troops, but he was intercepted. EXPLOSION IN A MINE.

Two Men Killed, Four Fatally and Others Seriously Injured.

Frank Isaacs Was Hurled Against the Entry Wall With Such Force That His Head Was Mashed Beyond Recognition.

Springfield, Ill., Oct. 14.—Two men were killed, four fatally and others seriously injured Monday afternoon in an explosion at Victor mine, Pawnee, 18 miles from here.

The dead: W. V. Overcash, aged 30, single; Michael Yorja, 27, single. Fatally injured: Frank Isaacs, 14, breaker boy, dying; Peter Green, head badly crushed; John Burke, frightfully bruised; George Worley, bruised and burned.

Others injured were Daniel Reeco, John Dick, William Sparling, John Pick, Peter Groves, Jerome Sprague, Thomas King, Joseph Buchner, Thomas King and several others.

The explosion occurred just before the day force of 100 men went off duty and was caused by too much powder in a blast, the concussion causing coal dust, which thickly overhung the mine, to explode with great force. Some idea of the force of the explosion can be learned from the fact that all those killed and injured were about 4,000 feet from the place where the shot was being fired. Isaacs was hurled against the entry wall with such force that his head was mashed beyond recognition. The company sent to the mine, ten miles distant, for three doctors. It is reported that Overcash was worth \$40,000 and had no relatives. He had been in town but a few days.

He Is Held Responsible for the Death of William Durham.

Shenandoah, Pa., Oct. 14.—The coroner's jury in the case of William Durham, who was shot and killed on Wednesday night last by Private Arthur Wadsworth, of the 15th regiment, national guard, Monday returned a verdict placing the responsibility for the death upon Wadsworth, expressing the belief that the shooting was hasty and unjustifiable and recommending that the matter be placed in the hands of the district attorney for investigation.

Wadsworth was on guard at the house of a non-commissioned quartermaster, who was developing a mine with dynamite had been made a few nights previous. Late on Wednesday night Durham approached the house and paying no attention to Wadsworth's order to halt, was shot and instantly killed, or that he thought the guard his friend. It is said he was formerly a national guardman and had a number of personal friends in some of the regiments and that he frequently visited them while on provost duty.

PROGRESSES SLOWLY.

Work on the New War Vessels Is Very Unsatisfactory.

Inability of Shipbuilders to Obtain a Sufficient Force of Skilled Workers in Many Cases Has Been an Important Factor.

Washington, Oct. 13.—"Progress upon new vessels under construction during the past year has not been satisfactory," says Mr. Adm. Bowles, chief of the naval bureau of construction, in his annual report to the secretary of the navy. All the larger vessels, he says, have been delayed by non-delivery of structural steel while the vessels building at San Francisco were set back by the ten months' strike, and the holdout of the workmen at Seattle prevented any actual progress on the structure of the hull of the battleship Nebraska, building there. The delay in the delivery of armor for the battleships Maine, Missouri and Ohio and the monitors Arkansas, Florida, Nevada and Wyoming has retarded the completion of these vessels, concurrently with other causes. The inability of shipbuilders to obtain a sufficient force of skilled workers also has been, in many cases, an important factor in the slow progress of the vessels. A table is submitted showing in concise form how the work on vessels under construction has fallen behind.

For instance, the battleship Ohio is shown to have been 25 months behind her contract on the 1st of July. This is not an isolated case. The battleship Missouri is over 20 months behind and some of the torpedo craft are more than 40 months behind the date of completion stipulated in their contracts. However, Adm. Bowles says that the extensive delays on the torpedo boats are being terminated by the newly modified conditions for their delivery. The contractors' delay in beginning the construction of the vessels of the Virginia, Pennsylvania and St. Louis classes, the chief construction points out, gave his bureau an opportunity to make a careful revision of the general plans of these war vessels, which, he says, will result in a considerable improvement in their military value and in their habitability. The plans for the turrets of the Virginia class were developed in more detail. An entire rearrangement of the scheme for the stowage of ammunition was made and particular attention was given to an efficient scheme for coaling. A table is given showing the ships added to the navy during the last year. They were the battleship Illinois and the torpedo craft USS Perry, Ireble, Biddle, Thornton and Wilkes.

Negotiations which began Saturday night continued until 7 o'clock Sunday morning, when the executive board finally decided to submit the matter to a general meeting of the union Sunday afternoon. The basis of settlement is that the men will go back to work in the morning at 20 cents and 10 hours, with a minimum of 7 1/2 hours a day, no discrimination to be made against any of the men under charges, and as many to be taken back as are needed for the operation of the company's lines.
